INTRODUCTION

The Revenue Canada Summary Report is published yearly by The Yukon Government, Bureau of Statistics. Data presented were derived from the most current available statistics released by Revenue Canada.

Data in sections 1 and 3 were taken from an annual publication entitled, Revenue Canada Taxation Statistics. The information in this publication is based on a sample set of returns. Data in sections 2 and 4 were based on 100% coverage and were taken from Revenue Canada Detailed Locality Tables. The data in sections 5 and 6 represent a deflated version of sections 3 and 4, respectively. In some cases entries may not sum to marginal totals due to independent random rounding.

This report is subdivided into three main parts. Part A analyzes data from the 1984 tax year and compares the Yukon and Canada in Section 1 and highlights the Yukon in Section 2. Part B provides a time series analysis (1974-1984) highlighting the Yukon in Section 3 and selected Yukon communities in Section 4. Part C analyzes changes in real income between 1974 and 1984 in the Yukon (Section 5) and in selected Yukon communities (Section 6).

Data presented in Sections 3 and 4 are deflated to the base year 1974 using the 1984 Consumer Price Index. Income values are deflated to control for such extraneous factors as inflation, thereby, enabling a realistic comparison of average income over time.

Revenue Canada is the most comprehensive source of income data, released on a yearly basis, for the Yukon and its communities. The following report is an excellent source of data for policy makers evaluating income related topics.

PART A

SECTION 1 - YUKON AND CANADA (1984)

SECTION 2 - YUKON AND SELECTED COMMUNITIES (1984)

HIGHLIGHTS - SECTION 1

*The average income in the Yukon for 1984 ($19,859) was 8.9% higher than that for Canada ($18,239).

*The average income for males in the Yukon ($24,685) was 71.1% higher than for females ($14,429). Males, for Canada as a whole, earned 96.5% more than females.

*In 1984 business employees were the single largest occupation group in the Yukon (5,392) with an average income of $19,986 compared to $20,245 for Canada.

*The highest average income in 1984 was earned by the Professionals occupation group, with $29,472 for the Yukon and $49,194 for Canada as a whole. The Professionals average income in the Yukon is much lower than Canada due to the large number (127) of self employed-professionals.

*In 1984 the largest percentage of returns in both the Yukon (34.2%) and Canada (37.5%) are in the less than $10,000 category. The income distribution pattern for the Yukon is quite different than that for Canada. The Yukon pattern is characterized by fewer filers earning less than $20,000 and more earning greater than or equal to $30,000. For Canada the opposite pattern is true.

*In 1984 wages and salaries represented 81.5% of all income for the Yukon and 73.4% for Canada.

*Unemployment Insurance benefits represent the single largest component of transfer payments for the Yukon, contributing 5.3% to income, compared to 3.3% for Canada.

HIGHLIGHTS - SECTION 2

*In 1984, Faro had the highest average income ($25,301) at 29.9% above the Yukon average ($19,480).

*Whitehorse registered the second highest average income ($20,594) in 1984, at 5.7% above the Yukon average.

*For the income category greater than or equal to $40,000 Faro had the largest relative proportion of returns (21.2%), followed by Whitehorse (11.0%) and Dawson City (6.8%).

*In 1984 71.3% of all returns filed in the Yukon originated from Whitehorse.

HIGHLIGHTS - SECTION 3

*For the period 1974-1984 the average income in the Yukon increased from $9,483 to $19,859. The average income for females increased from $5,580 to $14,429 while the average income for males increased from $12,425 to $24,685.

*The average income for pensioners showed the largest increase rising from $3,463 in 1974 to $13,858 in 1984 a 300% increase.

*In 1974, 2.3% of Taxable Returns in the Yukon were in the greater than or equal to $25,000 category, compared with 41.3% in 1984.

*Wages and salaries remained the dominant source of income for the Yukon for the period 1974-1984; however, its percentage of income dropped from 88.3% in 1974 to 81.5% in 1984 . Investments marked the largest percentage increase rising from 2.2% of income in 1974 to 5.2% in 1984.

Note: Due to extraneous factors (i.e. inflation) increases in average income do not represent an increase in real income.

HIGHLIGHTS - SECTION 4

*For the period 1979-1984 the average income in the Yukon increased from $13,962 to $19,480.

*Faro maintained the highest average income in the Yukon between 1979 and 1984, but it should be noted that a major drop occurred from 1981 to 1982 ($27,228 to $22,583) then began to rise again in 1983.

*The number of returns increased yearly for the period 1979-1981 (13,620 to 15,130) and then decreased in 1982 (13,904) and 1983 (13,373) then began to rise again in 1984 (13,919).

PART C

SECTION 5 - YUKON (1974-1984), IN 1974 DOLLARS

SECTION 6 - YUKON & SELECTED COMMUNITIES (1974-1984), IN 1974 DOLLARS

HIGHLIGHTS - SECTION 5

*Average income in the Yukon decreased from $9,283 in 1974 to $8,582 in 1984 (this represents a real decrease of 7.6%).

*The average income for females increased from $5,580 in 1974 to a high of $6,452 in 1976, an increase in real income of 15.6%. For the period 1976 to 1984 real income for females dropped from $6,452 to $6,236 (-3.3%).

*For males, average income fluctuated from a low of $12,425 in 1974 to a high of $13,526 in 1980 (8.9% increase in real income). In 1984 average income dropped significantly to $10,667 (-21.1%).

*The Professionals occupation group registered the largest decrease in real income from $23,259 in 1974 to $12,736 in 1984 (-45.2%). The gap between professionals and other occupation groups has narrowed significantly during this period. In contrast, pensioners registered the largest increase in real income (72.9%), rising from $3,463 in 1974 to $5,989 in 1984.

*Wages and salaries, as a percentage of income for the Yukon, have fallen from 88.3% in 1974 to 81.5% in 1984. Investment has shown the largest increase rising from 2.2% of income in 1974 to 5.2% in 1984.

YEAR

APPENDIX - DEFINITION OF TERMS

All Returns:

The number of taxable and non-taxable returns filed in a given tax year (prior to April 30).

Taxable Returns:

A return is considered taxable when a tax of a dollar or more is assessed; otherwise a return is non-taxable.

Filers:

The total number of individuals who file a tax return in a given tax year.

User Survey

WE NEED YOUR COMMENTS!

PUBLICATION: _____

USER COMMMENTS: _____

A. INFORMATION IN THE REPORT - is it useful? relevant? timely? _____

_____

B. FORMAT OF THE REPORT - is the information easy to find? presented clearly? _____

_____

C. INFORMATION WHICH SHOULD BE INCLUDED - are there statistics not presently in this publication which should be included? _____

_____

D. ADDITIONAL COMMENTS: _____
